## Introduction

This manual describes detailed instructions on the operation and notes about the use of this machine. To get maximum versatility from this machine, all operators are requested to read this manual carefully and follow the instructions. Please keep this manual in a handy place near the machine.

### Notes:

Some illustrations in this manual might be slightly different from the machine. Certain options might not be available in some countries. For details, please contact your local dealer.

### Operator Safety:

This machine is considered a class 1 laser device, safe for office/EDP use. The machine contains four AlGalnp laser diodes, 10-milliwatt, 770-810 nanometer wavelength for each emitter. Direct (or indirect reflected ) eye contact with the laser beam might cause serious eye damage. Safety precautions and interlock mechanisms have been designed to prevent any possible laser beam exposure to the operator.

### Laser Safety:

The Center for Devices and Radiological Health (CDRH) prohibits the repair of laser-based optical unit in the field. The optical housing unit can only be repaired in a factory or at a location with the requisite equipment. The laser subsystem is replaceable in the field by a qualified customer engineer. The laser chassis is not repairable in the field. Customer engineers are therefore directed to return all chassis and laser subsystems to the factory or service depot when replacement or the optical subsystem is required.

### Caution:

Use of controls or adjustments or performance of procedures other than those specified in this manual might result in hazardous radiation exposure.

### Notes:

The model names of the machines do not appear in the following pages. Check the type of your machine before reading this manual. (For details, see P.17 "*Machine Types*".)

- Type 1: 4051/DSm651/LD151/Aficio 2051
- Type 2: 4060/DSm660/LD160/Aficio 2060
- Type 3: 4075/DSm675/LD175/Aficio 2075

Certain types might not be available in some countries. For details, please contact your local dealer.

Two kinds of size notation are employed in this manual. With this machine refer to the inch version.

For good copy quality, the supplier recommends that you use genuine toner from the supplier.

The supplier shall not be responsible for any damage or expense that might result from the use of parts other than genuine parts from the supplier with your office products.

### Power Source

120V, 60Hz, 16A or more

Please be sure to connect the power cord to a power source as above. For details about power source, see P.130 "*Power Connection*".

# What You Can Do with This Machine

The following introduces the functions of this machine, and the relevant manuals containing detailed information about them.

Products marked with \* are optional. For details about optional products, see p.143 "Options", or contact your local dealer.

---

## Copier, Printer, and Scanner Functions

---

This machine provides copier, printer\* and scanner\* functions.

- You can make copies of originals. With a finisher\*, you can sort and staple copies. See *Copy Reference*.
- You can print documents created using applications. See *Printer Reference*.
- You can scan originals and send the scan file to a computer. See *Scanner Reference*.

---

## Utilizing Stored Documents

---

- You can store files of originals scanned by this machine, or files sent from other computers, onto the hard disk of the machine. You can print the stored print documents, as well as change print settings, and print multiple documents (Document Server). See p.38 "Using the Document Server".

## Notice To Wireless LAN Interface (option) Users

---

### Notes to users

It is strictly forbidden to use antenna(s) except designated.

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance.

### Notes to users in the United States of America

#### Notice:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### Warning

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## **Note to users in Canada**

### **Note:**

This Class B digital apparatus complies with Canadian ICES-003.

Operation is subject to the following two conditions:

(1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

IEEE 802.11b Interface Unit Type H:

This device complies with RSS-210 of Industry Canada.

The term "IC:" before the certification/registration number only signifies that the Industry Canada technical specifications were met.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (EIRP) is not more than that required for successful communication.

This device has been designed to operate with an antenna having a maximum gain of [0.45] dBi. Antenna having a higher gain is strictly prohibited per regulations of Industry Canada. The required antenna impedance is [50] ohms.

## **Remarque concernant les utilisateurs au Canada**

### **Avertissement:**

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

L'utilisation de ce dispositif est autorisée seulement aux conditions suivantes: (1) il ne doit pas produire de brouillage et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

IEEE 802.11b Interface Unit Type H:

Ce dispositif est conforme à la norme CNR-210 d'Industrie Canada.

L'expression «IC:» avant le numéro d'homologation/enregistrement signifie seulement que les spécifications techniques d'Industrie Canada ont été respectées.

Pour empêcher que cet appareil cause du brouillage au service faisant l'objet d'une licence, il doit être utilisé à l'intérieur et devrait être placé loin des fenêtres afin de fournir un écran de blindage maximal.

Si le matériel (ou son antenne d'émission) est installé à l'extérieur, il doit faire l'objet d'une licence.

Afin de réduire le risque d'interférence aux autres utilisateurs, le type d'antenne et son gain doivent être choisis de façon à ce que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne soit pas supérieure au niveau requis pour obtenir une communication satisfaisante.

Ce dispositif a été conçu pour fonctionner avec une antenne ayant un gain maximal de [0.45] dBi. Une antenne ayant un gain plus élevé est strictement interdite par les règlements d'Industrie Canada. L'impédance d'antenne requise est [50] ohms.

# Safety Information

When using this machine, the following safety precautions should always be followed.

---

## Safety During Operation

---

In this manual, the following important symbols are used:

**⚠ WARNING:**  
*Indicates a potentially hazardous situation which, if instructions are not followed, could result in death or serious injury.*

**⚠ CAUTION:**  
*Indicates a potentially hazardous situation which, if instructions are not followed, may result in minor or moderate injury or damage to property.*

---

**⚠ WARNING:**

---

- **Connect the power cord directly into a wall outlet and never use an extension cord.**
- **Disconnect the power plug (by pulling the plug, not the cable) if the power cable or plug becomes frayed or otherwise damaged.**
- **To avoid hazardous electric shock or laser radiation exposure, do not remove any covers or screws other than those specified in this manual.**
- **Turn off the power and disconnect the power plug (by pulling the plug, not the cable) if any of the following occurs:**
  - **You spill something into the machine.**
  - **You suspect that your machine needs service or repair.**
  - **The external housing of your machine has been damaged.**
- **Do not incinerate spilled toner or used toner. Toner dust might ignite when exposed to an open flame.**
- **Disposal can take place at our authorized dealer.**
- **Dispose of the used toner bottle in accordance with the local regulations.**
- **Keep the machine away from flammable liquids, gases, and aerosols. A fire or an electric shock might occur.**

---

**⚠ CAUTION:**

---

- *Protect the machine from dampness or wet weather, such as rain and snow.*
- *Keep the machine away from humidity and dust. Otherwise a fire or an electric shock might occur.*
- *Do not place the machine on an unstable or tilted surface. If it topples over, an injury might occur.*
- *If you use the machine in a confined space, make sure there is a continuous air turnover.*
- *Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.*
- *When you disconnect the power plug from the wall outlet, always pull the plug (not the cable).*
- *Do not allow paper clips, staples, or other small metallic objects to fall inside the machine.*
- *Keep toner (used or unused) and toner bottle out of the reach of children.*
- *If toner or used toner is inhaled, gargle with plenty of water and move into a fresh air environment. Consult a doctor if necessary.*
- *If toner or used toner gets into your eyes, flush immediately with large amounts of water. Consult a doctor if necessary.*
- *If toner or used toner is swallowed, dilute by drinking a large amount of water. Consult a doctor if necessary.*
- *Avoid getting toner on your clothes or skin when removing a paper jam or replacing toner. If your skin comes into contact with toner, wash the affected area thoroughly with soap and water.*
- *If toner gets on your clothing, wash with cold water. Hot water will set the toner into the fabric and may make removing the stain impossible.*
- *If your skin comes into contact with toner or used toner, wash the affected area thoroughly with soap and water.*
- *For environmental reasons, do not dispose of the machine or expended supply waste at household waste collection points. Disposal can take place at an authorized dealer.*
- *The inside of the machine could be very hot. Do not touch the parts with a label indicating “hot surface”. Otherwise, an injury might occur.*
- *The fusing section of this machine might be very hot. Caution should be taken when removing misfed paper.*
- *The fusing unit becomes very hot. When installing a new fuser oil unit, turn off the machine and wait about an hour. After that, install the new fuser oil unit. Not waiting for the unit to cool could result in a burn.*
- *Keep the fuser oil unit away from flames. There is a risk of fire or burns.*
- *Keep the waste oil bottle away from flames. There is a risk of fire or burns.*

---

**⚠ CAUTION:**

---

- *Do not use aluminum foil, carbon paper, or similar conductive paper to avoid a fire or machine failure.*

# Positions of Labels and Hallmarks for WARNING and CAUTION

This machine has labels for  WARNING and  CAUTION at the positions shown below. For safety, please follow the instructions and handle the machine as indicated.

ADH022D

Do not touch the paper exit section of the finisher. It could cause injury.

# ENERGY STAR Program

 The ENERGY STAR logo consists of the words "ENERGY STAR" in a sans-serif font above a stylized five-pointed star. The word "energy" is written in a cursive script across the bottom of the star. A thin horizontal line is positioned below the word "energy".	<p>As an ENERGY STAR Partner, we have determined that this machine model meets the ENERGY STAR Guidelines for energy efficiency.</p>
---	--

The ENERGY STAR Guidelines intend to establish an international energy-saving system for developing and introducing energy-efficient office equipment to deal with environmental issues, such as global warming.

When a product meets the ENERGY STAR Guidelines for energy efficiency, the Partner shall place the ENERGY STAR logo onto the machine model.

This product was designed to reduce the environmental impact associated with office equipment by means of energy-saving features, such as Low-power mode.

## ❖ Low Power Mode

This product automatically lowers its power consumption 1 minute after the last copy or print job has finished. Printing is still possible in Low Power Mode, but if you wish to make copies first press the **[Energy Saver]** key.

### 🔍 Reference

For details about how to change the default interval, see p.60 “Energy Saver Timer”.

## ❖ Off Mode (Copier only)

To conserve energy, this product automatically turns off 1 minute after the last copying or printing job has been completed. Printing is still possible in Off Mode, but if you wish to make copies first press the operation switch.

### 🔍 Reference

For details about how to change the default interval, see p.60 “Auto Off Timer”.

## ❖ Sleep Mode (Printer, Scanner installed)

If the printer and scanner are installed, this product automatically lowers further its power consumption 1 minute after it has shifted to Low Power Mode. Printing is still possible in Sleep Mode, but if you wish to make copies first press the operation switch.

### 🔍 Reference

For details about how to change the default interval, see p.60 “Auto Off Timer”.

❖ **Duplex Priority**

The ENERGY STAR Program recommends the duplex function. By conserving paper resources this function reduces a burden to the environment. For applicable machines, duplex function (one-sided originals→two-sided copies) can be selected preferentially when the operation switch or the main power switch is turned on, the **[Energy Saver]** key is pressed, or the machine resets automatically.

 **Reference**

To change the settings of the Duplex Priority mode, see “Duplex Mode Priority” in “General Features P.2/5”, *Copy Reference*.

# Multi-Access

You can carry out another job using a different function while the current job is being performed. Performing multiple functions simultaneously in this manner is called "Multi-Access".

This allows you to handle your jobs efficiently, regardless of how the machine is being used. For example:

- While making copies, you can scan documents to store in the Document Server.
- While printing documents stored in the Document Server, the machine can receive print data.
- While executing print jobs, you can make operations for copying.

 **Note**

- See p.54 "Print Priority" to set function priority. By default, the **[Display Mode]** is set to first priority.
- When the optional Booklet Finisher, or Finisher 3000B(100-Sheet Staples) is installed on the machine, you can specify the output tray to which documents are to be delivered. For more information about how to specify the output tray for each function, see the following descriptions:
  - p.55 "Output: Copier"
  - p.55 "Output: Document Server"
  - p.56 "Output: Printer"

 **Function Compatibility**

The chart below shows sample operations when "Print Priority" is set to "Interleave". See p.54 "Print Priority".

△: Simultaneous operations are possible.

●: Operation is enabled when the relevant function key is pressed and remote switching (of the scanner) is done.

○: Operation is enabled when the **[Interrupt]** key is pressed to interrupt the preceding operation.

# Using the Document Server

## Storing Data

### ❖ File Name

Stored documents will automatically be named as “COPY0001”, “COPY0002”. You can change assigned file names.

### ❖ User Name

You can register a user name to distinguish the user or user group that stored the documents. To register, you can either enter a name or use the one assigned to the user code.

#### Reference

For more information about the user name, see p.71 “Registering Names”.

### ❖ Password

You can set a password for stored documents, and use it to prevent others printing them. When a password is set for the documents,  mark appears next to the documents.

#### Reference

To store documents in a mode other than Document Server, see the manuals for the respective modes.

### Important

- ❑ Data stored in the machine might be lost if some kind of failure occurs. The supplier shall not be responsible for any damage that might result from the loss of data.
- ❑ Be careful not to let anyone know your password, especially when entering a password or recording it. Keep any record of your password in a secure place.

- ❑ Avoid using a single number or consecutive numbers for a password such as “0000” or “1234”, since the numbers like this are easy to guess, so using them will not provide a worthwhile level of security.
- ❑ A document accessed with a correct password remains selected even after operations are complete, and it can be accessed by other users. To stop this, be sure to press the **[Clear Modes]** key to cancel the document selection.
- ❑ The user name used when adding a document to the Document Server is to identify the document creator and type. It is not to protect confidential documents from others.

#### Note

- ❑ By default, data stored in the Document Server is deleted after three days (72 hours). You can specify the time taken for the stored data to be deleted automatically. See p.66 “Auto Delete File”.
- ❑ Before scanning documents using the scanner function, make sure all other operations have finished.

**1** Press the **[Document Server]** key.

ZGV5331N

## 2 Press [Scan Original].

## 3 Enter a file name, user name, or password if necessary.

### Note

- If you do not enter a file name, one will be automatically assigned.

### Reference

See p.39 "To register or change a user name".

See p.40 "To change a file name".

See p.40 "To set or change a password".

## Dos And Don'ts

### **WARNING:**

- **Keep the machine away from flammable liquids, gases, and aerosols. A fire or an electric shock might occur.**

### **CAUTION:**

- *Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.*

- Do not turn off the main power switch while the **On** indicator is lit or blinking. This may cause damage to the hard disk or memory.
  - Do not touch areas on or around the fusing unit. These areas get hot.
  - After scanning originals continuously, the exposure glass may become warm—this is not a malfunction.
  - When you use this machine for a long time in a confined space without good ventilation, you may detect an odd smell. To keep the workplace comfortable, we recommend that you keep it well ventilated.
  - The area around the ventilation hole may become warm. This is caused by exhaust air and is not a malfunction.
  - Do not turn off the power when the machine is in operation.
  - The machine might fail to produce good copy images if condensation forms inside due to rapid temperature change.
- Do not open the covers of the machine when it is in operation. If you do, misfeeds might occur.
  - Do not move the machine when the power is on.
  - If you operate the machine improperly or a failure occurs, settings might be lost. Be sure to make a note of your machine settings.

# Where to Put Your Machine

## Machine Environment

Your machine's location should be carefully chosen because environmental conditions greatly affect its performance.

### Optimum environmental conditions

#### CAUTION:

- *Keep the machine away from humidity and dust. Otherwise a fire or an electric shock might occur.*
- *Do not place the machine on an unstable or tilted surface. If it topples over, an injury might occur.*

#### CAUTION:

- *If you use the machine in a confined space, make sure there is a continuous air turnover.*

- Temperature: 10 – 32°C (50 – 89.6°F) (humidity to be 54% at 32°C, 89.6°F)
- Humidity: 15 – 80% (temperature to be 27°C, 80.6°F at 80%)
- A strong and level base.
- The machine must be level within 5 mm, 0.2" both front to rear and left to right.
- To avoid possible buildup of ozone, be sure to locate this machine in a large well ventilated room that has an air turnover of more than 30 m<sup>3</sup>/hr/person.

## Environments to avoid

- Locations exposed to direct sunlight or strong light (more than 1,500 lux).
- Locations directly exposed to cool air from an air conditioner or heated air from a heater. (Sudden temperature changes might cause condensation within the machine.)
- Locations close to machines generating ammonia such as a diazo copy machine.
- Places where the machine might be subjected to frequent strong vibration.
- Dusty areas.
- Areas with corrosive gases.

6

## Moving

#### CAUTION:

- *Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.*

#### Important

- When moving the machine, the following precautions should always be followed:
  - Turn off the main power. See p.28 "Turning Off the Main Power".
  - Unplug the power cord from the wall outlet. When you do, grip the plug to avoid damaging the cord and causing fire or electric shock.

- Close all covers and trays including the front cover and bypass tray.

### ⚠ **Limitation**

- ❑ Carefully move the machine. If you do not, the machine might be damaged or a stored file might be deleted.
- ❑ Avoid any strong shock to the machine. This could damage the hard disk and cause stored files to be deleted. For precautionary reasons, files should be copied to another local computer.

## Power Connection

### ⚠ **WARNING:**

- **Connect the machine only to the power source described on the inside front cover of this manual. Connect the power cord directly into a wall outlet and do not use an extension cord.**
- **Do not damage, break or make any modifications to the power cord. Do not place heavy objects on it. Do not pull it hard nor bend it more than necessary. These actions could cause an electric shock or fire.**

### ⚠ **CAUTION:**

- **Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.**

### ⚠ **CAUTION:**

- **When you disconnect the power plug from the wall outlet, always pull the plug (not the cable).**

- When the main power switch is in the stand-by position, the optional anti-condensation heaters are on. In case of emergency, unplug the machine's power cord.
- When you unplug the power cord, the anti-condensation heaters turn off.
- Make sure that the plug is firmly inserted in the outlet.
- Voltage must not fluctuate more than 10%.
- The socket-outlet should be installed near the equipment and should be easily accessible.

<sup>\*1</sup> The paper tray fence is fixed. If you wish to change the size of paper placed in this tray, contact your service representative.

<sup>\*2</sup> The optional tab sheet holder is required.

<sup>\*3</sup> The paper size is detected automatically.

<sup>\*4</sup> Select the paper size in System Settings. See p.58 "Tray Paper Size: (Tray 2,3)".

<sup>\*5</sup> Press [Bypass], and the [#] key, and then select the paper size.

<sup>\*6</sup> Press [Bypass], and the [#] key, and then enter the paper size using the number keys.

<sup>\*7</sup> If you wish to copy onto OHP transparencies or thick paper, select "OHP" or "Thick Paper". See Copy Reference

<sup>\*8</sup> The optional B4 JIS/8<sup>1</sup>/<sub>2</sub>"×14" tray unit is required to load B4 JIS/8<sup>1</sup>/<sub>2</sub>"×14" size paper. (2,500 sheets can be loaded in this tray.)

\*9 When loading paper, make sure the stack height does not exceed the lower limit mark of the paper tray. The amount of paper that can be set is 10 mm/100 sheets approximately. See p.98 “ Loading Paper”.

\*10 It is recommended to place one sheet at a time.

\*11 When loading translucent papers, set the paper direction according to the grain.

### Important

If you use damp or curled paper, a misfeed may occur.

### Note

- When loading paper in the paper trays 1-3, place the copy side face down.
- When loading paper in the large capacity tray (LCT), place the copy side face down.
- When loading paper in the bypass tray, place the copy side face up.
- When you use the bypass tray, it is recommended to set the copy paper direction to .
- Do not use paper for inkjet printers.
- When you load OHP transparencies, check the front and back of the sheets, and place them correctly, or a misfeed might occur. Set the paper direction to . For details, see *Copy Reference*.
- When you use OHP transparencies, fan them for each use.
- If multiple sheet feeding occurs, load sheets one by one.
- When you load label paper, set the paper direction to .
- If you load paper of the same size in the same direction in two or more trays, the machine automatically shifts to the other tray when the first tray in use runs out of paper. This function is called Auto Tray Switching. (However, if the Paper Type of one tray is recycled or special paper, the settings of the other trays must be the same for the Auto Tray Switching function to work.) This saves interrupting a copy run to replenish paper when making a large number of copies. See p.58 “Tray Paper Size: (Tray 2,3)”, and *Copy Reference*.
